Concrete base plate for tennis table

Product code: OP.PP

Solve any lawn mowing problems in one go with this concrete base plate for the HeBlad ping pong table.
Also suitable for use under a foot volleyball table. We have developed a concrete base plate with a size of 299 x 179 x 10 cm especially for our rectangular ping pong tables and the ping pong tables with rounded corners. The bottom plate keeps the space under the ping pong table free of weeds and makes the immediate area around the table very easy to keep clean. The base plate also provides the necessary stability. No more sagging gaming table, no more sloping table top: just gaming pleasure.

Supply and installation of concrete base plate

We can only unload a concrete base plate and products with a base plate if the location is within crane reach, in this case within 5 meters. We can also only supply concrete for this base plate for our ping pong table if we can get close enough. For the exact conditions for delivery of the concrete base plate for ping pong tables, it is advisable to contact the professionals at HeBlad. Because this base plate is placed at ground level, it is important that the truck with loading and unloading crane can reach within 5 meters of the final location. Before the base plate can be laid, the sand bed is first adjusted to height. If the delivery conditions are met, delivery of the concrete base plate comes at no cost for you.

Various versions of concrete base plate for table tennis tables and a foot volleyball table

Because we produce our ping pong tables in different colours, we do the same

with the base plates. In addition to this natural concrete base plate, you also have the option to choose the anthracite concrete base plate. With the same dimensions and specifications, made of coloured concrete. So combine the concrete base plate with other HeBlad game and play tables to your heart's content. Consider, for example, a ping-pong table. A table on which a game of chess, checkers and/or ludo can be played is also ideal.

This way you create an attractive scene in your public space. A place to be together for young and old. A social event where active games, rest and togetherness can be alternated.

Bottom plates will be placed at ground level. When the sand bed is ready at height, we can place the base plates in the right place with the crane, provided this is within 5 meters of our truck.
