Chess Table Natural Concrete (2P)

Product code: GT.CH.2

This concrete chess table for two people is made of Natural Concrete. The 'Concrete look' that results from this gives a beautiful appearance. The chess fields are made of natural stone and integrated into the concrete by us. Of course, this game table is also weatherproof. The base plate is 60 x 149 cm. By removing two rows of five paving stones from a square with average paving stones, a space of 60 x 150 cm is created. By placing the concrete chess table in this area, it will be completely integrated into your schoolyard.
If you want to place the table in a park, the required surface can be excavated so that the base plate can be placed there, at cutting height.

Concrete chess table for outdoor use

Chess is a strategic game and therefore very important that you think carefully about every step you take. What's better than playing chess in the open air! Fresh air ensures better concentration and, above all, it is also very healthy to spend time outdoors. The HeBlad tables do not take up much space and are completely installed by our professionals. In addition to the tables, the chess pieces are also available at HeBlad. When you order you will now receive 1 set of chess pieces for free. And of course our tables are so robust that they can withstand the UK weather.

Chessboard integrated in concrete

A chessboard is always square and consists of 64 square faces, 32 white and 32 black that alternate. The coloured square has been fully integrated into the concrete by HeBlad, so that it is vandalism and weather resistant.

Concrete chess table in the colour Natural
The HeBlad chess table consists of one main table with the white and black surfaces incorporated into it. In addition to the table, two chairs have also been made on the base plate. The entire table is made in natural concrete colour. This creates a peaceful appearance and is therefore ideal for a park or camping site.

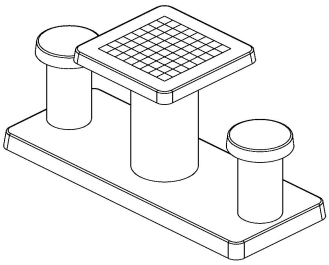

About the game of chess
Chess is a popular strategic game that can keep you entertained for hours and consists of three phases, namely the beginning, the middle game and finally the end game. The game is played all over the world and the game has the same name in most languages. In the endgame the idea is that the path to the opponent's king is completely open. When this is the case, all that remains is to shout: checkmate!

Organize tournaments
In addition to our chess table, HeBlad also produces other game tables, such as checkers tables and ludo tables. Ideal for a fun and fanatical games tournament. Would you like more information about all our gaming tables? Take a look here or contact one of our employees. We are happy to help you and provide tailor-made advice.

*When you order one chess bench, you will receive 1 set of chess pieces.
