

Checkers Tile Natural Concrete

Product code: GT.CK.T

If there is insufficient room in a town-square for a Checkers Bench or Checkers Table, it is possible to place a Checkers Tile in an existing square. Children do not mind playing a game on the ground. They will play checkers happily, and when they stop playing, the Checkers Game doesn't get in the way, not taking up any space. These tiles are also available as Chess Tiles or in Ludo format. Here again one has a choice between Anthracite-Concrete or Natural Concrete.

* When ordering these tiles you will receive 2 sets of checkers free of charge.
