Concrete Ping-pong table anthracite, rounded

Product code: PP.AR.A

In addition to Heblad's standard table tennis tables, we designed the concrete table tennis table with rounded corners in, among other things, the colour anthracite. The rounded corners make it possible for even the youngest children to play a game of ping pong safely, because the risk of bumping into the sharp corners is removed.

The power of the concrete table tennis table rounded anthracite

The concrete table tennis table with rounded corners is cast from one piece of concrete. The table top, the net and the legs are all cast in 1. This makes the table strong and makes it so that you can enjoy years of carefree playing pleasure. This ping pong table is a nice addition to your site, park or garden. This concrete table tennis table with rounded corners has an anthracite lacquer layer. The two-component lacquer with which the table top is treated and with which the white lines are drawn is of such good quality that it does not flake off. The table tennis table therefore retains its chic appearance. The applied top and bottom reinforcement makes the table extra strong and immovable to vandals. A sturdy, robust table with a chic colour!

Combine the concrete table tennis table rounded anthracite

Do you like the colour anthracite? Then the standard anthracite oval concrete bench would look great next to the anthracite table tennis table. The oval shape of the bench fits nicely with the rounded corners of the table tennis table. The standard anthracite concrete bench would also be an asset next to the table tennis table. In addition to the fact that these colours form a unity on your site, the

benches also provide seating for spectators and at the same time form a beautiful separation from a different part of the terrain. If you place the benches in front of a building, you even have good armor against ram raids, for example.

Ping pong table with rounded corners, ideal for wheelchair users

This version of our concrete ping pong table with rounded corners offers the same advantages as our standard model, but without the traditional sharp corners. Wheelchair users find the design very pleasant due to the generous space underneath the table. Available in green, blue, anthracite, natural concrete, and anthracite concrete.
