Ping pong table low, rounded Blue

Product code: PP.AR.LOW.BL

Did you know that children from the age of 5 start developing their ball handling? Challenge them to a game on the table tennis table and stimulate their development. We have developed a low model of our concrete table tennis table especially for this purpose. On this low table tennis table, smaller children also have the opportunity to return a ball well. When little children play at a regular table tennis table, they often get hit in the face by the ball, or sometimes the ball even flies over their head. To accomodate for younger children, we designed a lower model table tennis table, which offers them the same opportunities the older children have.
This low concrete table tennis table is 25 centimeters lower than a competition table. For extra safety, these table tennis tables have rounded corners, which provides more safety than the regular table tennis table. Games other than table tennis can also easily be played on this lowered game table by older children and adults, such as foot volleyball. This table is ideal if you don't have enough space for an actual foot volleyball table.

Where are HeBlad's low table tennis tables located?
You will find our ping pong tables at campsites, playgrounds, parks and many other public or private areas. Wherever games can be played, you will find HeBlad's robust gaming tables. The low ping pong table with rounded corners is specifically designed for placement on school grounds for children in the lower grades of primary school. The table can certainly also be used for other purposes.

Combine the table tennis tables low with other game tables
The low table tennis table can be ordered in the colours green, blue and anthracite. This low table can also be perfectly combined with all other HeBlad

gaming tables, but also with benches and picnic sets. Because almost all our products are cast from one piece of concrete, they have a long lifespan and can be combined very nicely with each other.

Bottom plate for the ping pong tables
When is a base plate required for a ping pong table? This depends on the stability of the surface and whether maintenance can easily be carried out on the ground under the table. An optional base plate can be ordered for each ping pong table. This is not included with the table and certain conditions apply to installing a base plate.
We do recommend that you contact us when you are considering purchasing a base plate. This way we can be well prepared when it comes to the installation of both base plate and the table, and inform you of any conditions that come with the installation of tha base plate.
