Concrete Bench Standard Anthracite

Product code: BB.ST.A

With a seat height of 50 cm and a seating surface of 175 x 30 cm, it is wonderful to sit on this concrete bench, standard in anthracite version. Just like the shape of this concrete bench is, the anthracite lacquer layer is really sleek. A true addition to your site, in the park or on the schoolyard.

Place the concrete bench near game tables and ping pong tables

Due to its sleek shape and smooth paint, this concrete bench in anthracite version can be perfectly combined with other HeBlad gaming tables. For example, place the concrete bench near a ping-pong table and you are guaranteed an audience. While a number of people enjoy a game of table football, others can rest or watch from the concrete bench.
Because HeBlad's ping pong tables, like the benches, are made from a single piece of concrete, you never have to worry about weathered attributes on your site. All our products are easy to maintain and resistant to all weather influences.

Also use a concrete bench as a blockade and security

This 800 kg concrete bench is ideal as a blockade or for security. It is not inviting to break in when a blockade of robust concrete has been erected. Another use of our concrete bench is as a road blockage.
In addition to a nice seating area, you also give yourself and the users safety by placing this concrete bench. Because the concrete bench does not need to be anchored, the bench is immediately ready for use.
